SUMMARY

Data Scientist / Analyst with a PhD in Biology, bringing 20+ years of scientific experience and 3+ years applying data analytics to generate actionable insights for R&D and business growth. I combine scientific rigor with modern data science skills—Python, ML, SQL, Power BI, and workflow automation—to streamline decision-making and accelerate innovation.

Experienced in transforming raw, multi-source data into strategic intelligence through statistical modeling, feature exploration, and interactive dashboards. I specialize in bridging domain expertise and business systems by building automated data pipelines that support prioritization, monitoring, and strategic planning. Passionate about leveraging data-driven thinking to enhance business productivity, operational efficiency, and evidence-based strategy in technology-driven environments.

RELEVANT EXPERIENCE

Data Scientist

ICL Group

2024 - 2026 Ness Ziona, Israel

- Analyzed multi-source R&D datasets using Python to support project feasibility assessment and prioritization.
- Developed Power BI dashboards to surface trends and patterns, enabling data-driven discussions and management-level decision-making.
- Streamlined data collection and preprocessing workflows through API integrations, Python automation, and Power Automate, improving data availability and consistency for analysis.
- Delivered ad-hoc exploratory analyses for R&D scientists and management, translating scientific questions into structured analytical outputs.
- Collaborated in a multi-professional environment, aligning insights with strategic and business goals.

Scientific Project Manager

National Center for Genome Editing in Agriculture (Volcani Institute, ARO)

2020 - 2024 Rishon LeZiyyon, Israel

- Led a multidisciplinary innovation center, overseeing scientific projects while supporting data-driven monitoring and coordination
- Performed data analysis, web scraping, and BI dashboarding to synthesize scientific and regulatory information related to genome-editing initiatives
- Applied analytical thinking to support regulatory advocacy, project planning, and stakeholder alignment
- Facilitated cross-functional and international scientific seminars, enabling knowledge sharing and alignment across diverse professional groups

Project Manager - Plant & Fungi RNAi Projects

QBI Enterprises Ltd

2015 - 2016 Ness Ziona, Israel

- Led development of siRNA-based projects, defined experimental workflows and project strategies
- Designed and implemented research protocols, supported structured data collection and analysis in a fast-paced R&D environment

CORE EXPERTISE

Data-driven problem solving • Analytical thinking • Attention to detail • Cross-functional collaboration • Stakeholder communication • Autodidact • Creativity

PORTFOLIO

Portfolio

<https://youlia-denisov.github.io>

SKILLS

Data Analysis & Data Science

Python (pandas, polars, NumPy, SciPy, PySpark, scikit-learn), EDA, statistical analysis, hypothesis testing, ML

Data Preparation & Integration

SQL (queries, joins, ETL), DWH, multi-source data integration

BI & Data Storytelling for decision support

Power BI, Tableau, Plotly, seaborn, Streamlit

Automation & Workflows

APIs, Python automation, Power Automate, Bash, Git

EDUCATION

Practical Data Scientist

NAYA

2023 - 2024

Data Analyst

John Bryce

2023 - 2024

PhD, Biology

The Hebrew University of Jerusalem

2003 - 2009

LANGUAGES

FLUENT

EN • HEB • RUS
